**SUMMARY OF REVISIONS FROM
ORGANIC WASTE DIGESTION PROJECT PROTOCOL
VERSION 1.0 TO 2.0**

June 29, 2011

The following changes were made from the Organic Waste Digestion Project Protocol V1.0 to V2.0:

1. Several updates for consistency with the Organic Waste Composting Project Protocol V1.0
 - a. Section numbering in Section 2
 - b. Expanded waste stream eligibility to include food-soiled paper waste
 - c. Updated Section 3.5.2.1 Legal Requirement Test for Local Waste Diversion Mandates
 - d. Updated baseline quantification methodology for food waste and food-soiled paper waste
 - e. Additional guidance on demonstrating eligibility of grocery store waste streams
2. Combined SSR 2 and SSR 3
3. Modified climate regions for selection of k value
4. Clarified guidance for livestock manure quantification
5. Updated methane monitoring, metering, and calibration guidance
6. Updated site-specific waste characterization requirements
7. Removed eGRID factors and replaced with reference to most recent factors provided by EPA
