U.S. Landfill Protocol Summary of Changes from Version 5.0 to Version 6.0

June 8, 2022

The U.S. Landfill Protocol Version 6.0 incorporates the following significant changes from Version 5.0.

Section 3. Eligibility Rules

- Added flexibility to allow projects to apply for a third crediting period (Section 3.3)
- Clarified credit stacking requirements for reporting periods during which a project is not reporting to the Reserve but wishes to remain an active project for potential future generation of CRTs (Section 3.4.2)

Section 6. Project Monitoring

- Updated Table 6.1 to better reflect qualitative and quantitative monitoring parameters (Section 6.4)

Section 7. Reporting Parameters

- Clarified the amount of data allowed to be verified during one verification period (Section 7.3.2)

Section 8. Verification Guidance

- Clarified that verification bodies can verify landfill projects after completing appropriate Reserve or CARB sector training for other protocol types (Section 8)
